

The Douglas Fir Beetle (*Dendroctonus pseudotsugae*) Synergy Semiochemicals Lure (#3187)

The Synergy Lure (#3187) is made up of 4 components:

- A) Seudenol BC
→comes in a brown bag with D
- B) Douglas Fir Kairomone bottle
→comes in a white bag
- C) Low release ethanol
→comes in a white pouch
- D) Frontalin CT

Field Life: Contents slowly release through the plastic pouches and last approximately **90 days @ 20° C.**

Storage: Stored un-used lures in a freezer.

Lure Hanging: Thread twist-tie (provided) through the hole-punch near the top of the bags. Tether components together to the outside of the trap. We recommend tethering the lures toward the bottom third of the trap.

Important Note! Do NOT open pouches or puncture any of the plastic bubbles. These pouches are part of the controlled release system and protect the lure's active ingredients from the outside elements.

Safety and Disposal: Components are generally non-toxic chemicals with little risk in handling them. However, users should use gloves or wash their hands after handling and keep lures out of reach from children and pets. Spent lures may be disposed of in normal trash.

General Info: This is a funnel lure used to **attract** the beetle. Traps are used as part of a monitoring or Integrated Pest Management strategy.

Repellents: If you want to **repel** Douglas Fir Beetle please refer to our Synergy MCH products (#3071 and #3311)
