The Southern Pine Beetle (*Dendroctonus frontalis*)

Synergy Semiochemicals Lure (#3517)

The Synergy Lure (#3517) is made up of 3 components, with one component needing to be hung separately.

A) Southern Pine Beetle UHR
→*comes in blue bag*

B) Frontalin
→*comes in a brown bag*

Separate Component: Endo- Brevicomin flexlure
→*comes in a brown bag*

Endo-Brevicomin flexlure increases trap catches by (at least) 10 times. It must NOT be deployed in the trap. Instead it must be deployed 12-15 ft AWAY from trap.

Field Life: Contents slowly release through the plastic pouches and last approximately **42 days @** 20° C.

Storage: Stored un-used lures in a freezer.

Lure Hanging: Thread twist-tie (provided) through the hole-punch near the top of the bags. Tether the Frontalin and UHR bags together to the trap, but the Endo-Brevicomin must be deployed on a stake 12-15 feet AWAY from the trap (where the Frontalin and UHR bags are).

Important Note! Do NOT open pouches or puncture any of the plastic bubbles. These pouches are part of the controlled release system and protect the lure's active ingredients from the outside elements.

General Info: This is a funnel lure used to attract the beetle. Traps are used as part of a monitoring or Integrated Pest Management strategy.
